**SOLUTION CREATOR
SINCE 1996**

MADE IN FRANCE

— SMARTSHIELD —

Tactical visualization or day-night and/or thermal imaging

Regardless of your ballistic protection shield, the **SMARTSHIELD (SMD)** Range allows you to detect the invisible and thus perfect mission. Ideal for operations in complex or isolated environments (low visibility, coldsmoke, ect).

We guarantee you maximum longevity of use thanks to our expertise in study, manufacturing, and long term after-sales service carried out within our company.

SMARTSHIELD

Application Android

The SMD system comes with a dedicated application for smartphones and tablets (Android 10 minimum). Which enables real-time visualization and recording of images for operational needs or training exercises. The recording function can be enabled or disabled with a user-defined code.

Access to functions via the terminal's touch screen allows management of image streams from one camera to another. Recording of video streams (day, night and/or thermal) is done on separate files.

CROSSCALL X5 TERMINAL

CROSSCALL T5 TERMINAL

clamp-type mounting

30 mm to 40 mm
1,18 inch to 1,57 inch

40 mm to 50 mm
1,57 inch to 1,96 inch

POLE

Folded pole
32cm / 12,60 inch

Extended pole
125cm / 49,21 inch
